## 1.

# SAFETY INSTRUCTIONS AND WARNINGS

### The main safety instructions:

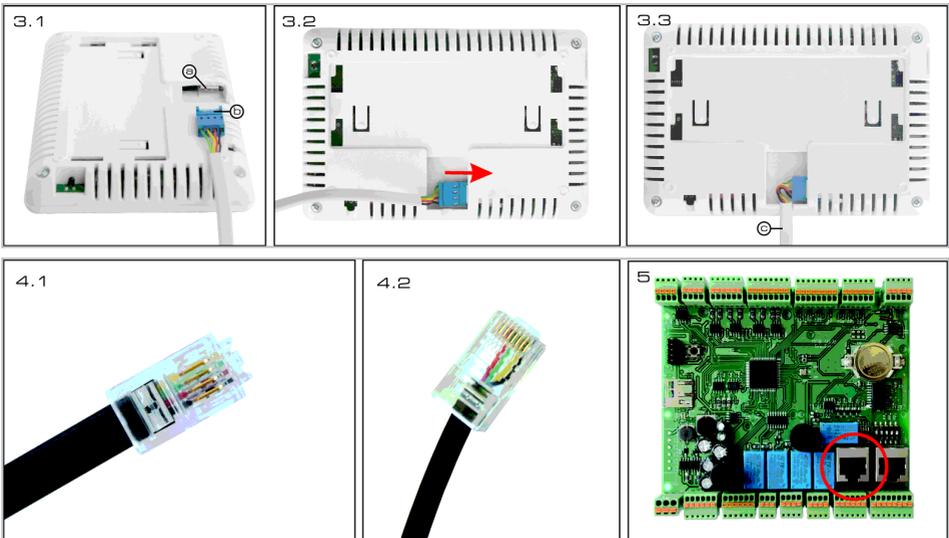

- Operate the equipment strictly within the provided temperature range.
- Prevent the possibility of moisture in the equipment.
- Keep the equipment away from direct sunlight.
- Protect the equipment from mechanical damage (hits, scratches, etc.).
- Mounting and installation work can only be performed by a qualified person.
- Electric connection must be performed according to electrical schematics and the technical requirements of the manufacturer.
- Avoid the use of foreign objects in the equipment.

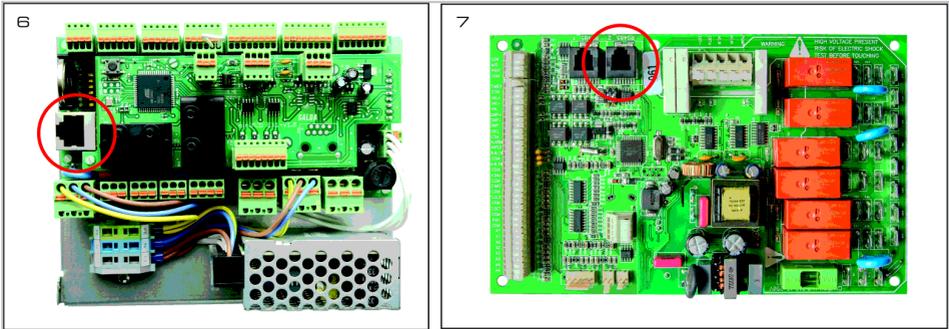

## 2. INSTALLATION

### 2.1. CONNECTING SA-CONTROL TO AIR HANDLING UNIT

Use the following steps to connect a SA-Control remote controller to an air handling unit:

- Unpack the SA-Control remote controller
- Connect the cable to the connector slot on the control panel **pic. 3.1 - 3.3**;
  - Use the cable with an RJ10 connector for the connection to the air handling unit with PRV control board (further RJ10 cable) **pic. 4.1**;
  - Use the cable with an RJ45 connector for the connection to the air handling unit with a MCB or mini MCB control board (further RJ45 cable) **pic. 4.2**.
- Plug in the RJ45 cable connector to the X18 MCB **pic. 5** or X18 miniMCB **pic. 6** connection slot on the control board. Make sure that the unit is switched off during the operation. If the ventilation unit is equipped with a PRV control board, plug the RJ10 cable connector into the RS485\_2 slot on the equipment casing, **pic. 7**;
- Plug the ventilation unit into the electric circuit.

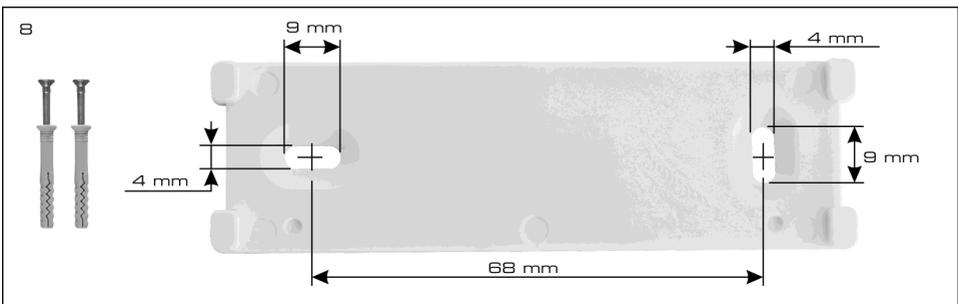

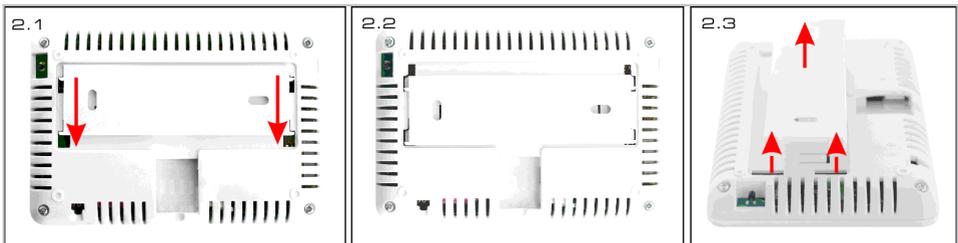

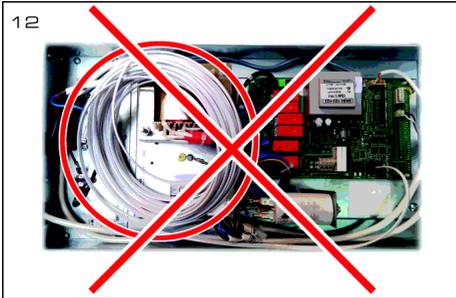

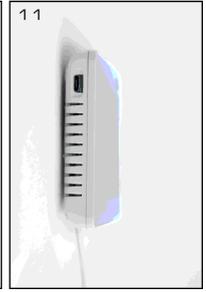

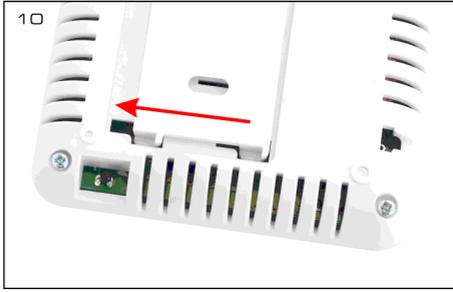

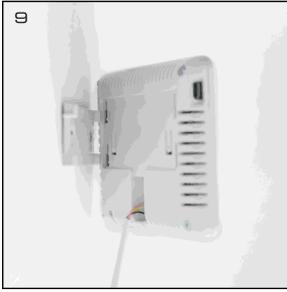

## 2.2. HOW TO MOUNT SA-CONTROL ON THE WALL?

- Turn the panel **fig. 2.1**.
- Put it at the desired location on the wall **pic. 8 - 11**. Mark the positions of the mounting holes.
- Drill two 5 mm holes at the marked positions for the nylon plugs and the hole throughout the wall to install the cable **pic. 9**. Insert the nylon plugs. **NOTE:** You can use special metal plugs (included) instead of the nylon ones.
- Use the included 2.9x16 DIN7981C screws and mount the panel to the wall as indicated in **fig. 8**.
- Put the panel on the mounting bracket **fig. 9 - 11**.

**IMPORTANT: IT IS FORBIDDEN to leave the remaining remote controller's cable in the AHU's control box pic. 12!**

**IMPORTANT: Do not forget to connect the cable before attaching the panel.**

## 2.3. TROUBLESHOOTING

FAULT	SUGGESTED ACTION
Remote control panel doesn't turn on.	<ul style="list-style-type: none"> <li>• Check if ventilation unit is turned on.</li> <li>• Check connection cable of the control panel</li> <li>• Touch the screen for at least 3 sec.</li> </ul>
Remote panel can't connect to the ventilation unit	<ul style="list-style-type: none"> <li>• Check the connection cable</li> <li>• Check the connection settings</li> </ul>
Clock resets after restarting of the ventilation unit (PRV control board)	<ul style="list-style-type: none"> <li>• Check if backup power battery is connected</li> </ul>
One or several functions do not work properly	<ul style="list-style-type: none"> <li>• Update the software</li> </ul>
Remote panel does not start up	<ul style="list-style-type: none"> <li>• Update the software</li> </ul>
Remote panel does not beep after touching	<ul style="list-style-type: none"> <li>• Check the audio settings</li> </ul>
The colors are not correctly reflected on the screen	<ul style="list-style-type: none"> <li>• Contact the supplier</li> </ul>
Control panel doesn't work	<ul style="list-style-type: none"> <li>• Contact the supplier</li> </ul>
Unable to update a software of the remote panel	<ul style="list-style-type: none"> <li>• Contact the supplier</li> </ul>

## 3. PRODUCT INFORMATION

### 3.1. DESCRIPTION

**The SA-Control remote control panel is designed for:**

- SALDA ventilation units and other devices based on PRV (RIS EKO 3.0, RIRS EKO 3.0), MCB/MiniMCB (Smarty, AmberAir, AmberAir Compact) controllers;
- Modbus-controlled devices.

**Attention!**

- Some of the articles in this guide may not apply to you. It depends on the type of the control board on your device.
- Always choose accessories manufactured by Salda UAB. Otherwise, the warranty will be void.

### 3.2. TECHNICAL DATA

PARAMETER	UNITS	VALUE
Mounting		Surface
Voltage	V (AC/DC)	24 (max 1,3 W)
Communication line		ModBus RS485
Cable length	[m]	13
Dimensions (W x H x D)	[mm]	123 x 82 x 15
Weight	[g]	150 g (+-10 g)
Protection class		IP-30
Ambient temperature	[°C]	10 - 40
Relative humidity	[%]	10 - 80 (without condensation)

### 3.3. PACKAGE

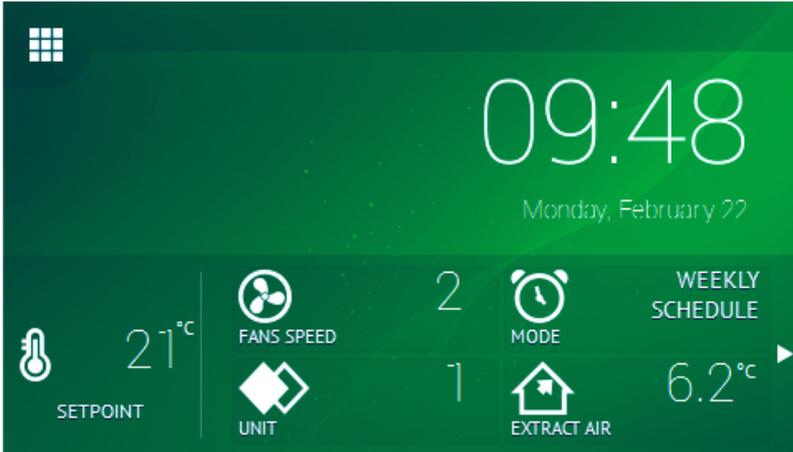

#### Accessories to a SA-Control:

- 1x SA-Control control panel;
- 2x Cables (RJ45 for MCB/MiniMCB and RJ10 for PRV);
- 2x Fastening elements (screw 3,9 x 25 DIN 7981 – 2 pcs, nylon plug 5x25 – 2 pcs, hammered steel plug 12x30 – 2 pcs);
- 1x Quick Launch Guide.

## **7. RECYCLING**

### **Electrical and electronic waste.**

- Follow local regulations regarding disposal of the equipment.
- Bring the equipment to a recycling area or container in order to minimize the effect on the environment and public health.
- For further information on recycling, please contact the seller or the supplier.

## 8. WARRANTY

Dear Consumer, we appreciate your choice and guarantee that all ventilation equipment manufactured in our plant is carefully checked and tested. Direct buyer gets functioning and good quality product straight from the territory of the company. **The product is given a 24-month warranty from the invoice date.** Your opinion is very important for us, therefore we always welcome your comments, feedback or proposals regarding technical and operational qualities of the equipment.

In order to avoid any misunderstandings, please read the technical manual carefully. The equipment series number on sticker placed on the equipment must correspond to the number indicated in the warranty certificate.

The warranty certificate is effective if it has clear stamps and entries of the seller on it. It is forbidden to change, erase or rewrite any information indicated in the warranty certificate – this makes the warranty certificate ineffective.

By this warranty certificate the manufacturer confirms the obligations provided for in applicable consumer protection laws to fulfil consumers' requirements in case defects in products are found.

The manufacturer retains the right to refuse providing free warranty service in case the following warranty conditions are not met.

### Warranty conditions

1. The term of the manufacturer's equipment quality warranty indicated in this certificate starts to run from the date of the invoice.
2. If equipment is damaged during transportation, claims must be made to the transportation company.
3. Warranty does not apply in the following cases:
  - if the buyer cannot present a warranty certificate;
  - if the equipment series number on the identification sticker placed on the equipment is changed or removed;
  - in case of a breach of the rules and conditions for using the product given in the product transportation, assembly and service instructions;
  - in case of improper operation of the equipment – failure to perform technical maintenance;
  - when the equipment is used not for its direct purpose;
  - when the equipment was modernized or repaired without the company's knowledge and consent;
  - in case of mechanical damage;
  - in case of damage caused by strange items, substances, liquids that got inside the equipment;
  - when failure is caused by a natural disaster, emergency (change of voltage in the power supply system, lightning, etc.) or accident.
4. The company does not assume liability for direct or indirect damage caused by its products if the cause of such damage is failure to observe the rules and conditions for use and assembly of the equipment, wilful or negligent conduct of consumers or third parties. The above-listed operation mistakes and damage to the equipment can be easily noticed after return of the product to our plant and performance of initial examination. If the buyer notices that the ventilation equipment does not function or fails to function properly, he must apply to the company that sold the ventilation equipment, indicating reasons for the application and must deliver the equipment to the manufacturer at his own expense.

I received complete package and technical manual of the product ready for usage. I have read warranty terms and conditions and agree with them.
